

AMENDMENTS TO THE SPECIFICATION

Kindly amend the specification without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, as follows:

Please amend the paragraph beginning on page 17, line 10 of the Specification as originally filed (paragraph [0089] of the application published as 2007/0271857) as follows:

At each corner of the module 10, a fastening element in the form of a respective corner casting 21 is provided. Each corner casting 21 is of the kind conventionally found on freight containers and is of hollow construction with external top, side and end apertures 22 providing access into the interior of the casting. Each casting 21 is made generally in accordance with ISO/TC-104-1161 but with variations in the external length of the casting in some cases and with the front apertures of the upper castings being in accordance with the dimensions set by the standard for the ~~front~~ front apertures of the bottom castings.
